To me, being a global citizen means understanding that everything's connected.

We should have a world by now where every child is born with the same rights to life.

Each person must have something to contribute to make the world a better place.

We live in a world that is inescapably interconnected. What we do in one place affects someone on the other side of the world.

[The world we want] protects and sustains the environment.

Depending on where a child is born, the access to basic human rights is so different.

What we do really does make a difference to other people.

Ending extreme poverty... I think it is possible. Everything that has a beginning has an end.

If we know that we belong to the same humanity, then we are brothers. Everywhere is my country.

Making decisions based on the good of everyone, not just ourselves.

[The world we want] is about equality...about access...about justice....about freedom.

The world we want and the world we're envisioning is the world we're going to make, and it's going to be beautiful.

We can't limit our concerns to national boundaries.

“**TeachUNICEF**’s definition of ‘global citizen’ is ‘someone who understands interconnectedness, respects and values diversity, has the ability to challenge injustice, and takes action in meaningful ways,’ but this is by no means the one definition for everyone. It can and should reflect the character of the class, school, and community.”
